PROFESSIONAL PROFILE

A disciplined and detail-oriented professional with a unique intersection of **MSc-level scientific rigour**, **6 years of manufacturing quality auditing**, and a diverse skill set that ranges from data analysis in Logistics & **advanced software QA/Automation expertise(Selenium Web-driver)**. Adept at developing E2E Project Plan from Business Requirements(SDLC) to Test Plan(STLC) for model outputs. I bring a "zero-defect" mindset ensuring structured reasoning and process integrity in every workflow.

WORK EXPERIENCE

- QA Engineer** Jan '24 — Present
Genesis Digital Labs Lagos, Nigeria
 - Continuous Automation Refinement:** Developed and debugged **Playwright** and **Selenium** automation test suites to ensure reliable regression tests
 - Operational Management:** Balanced active testing cycles with business administration, reporting, and client acquisition activities.
 - User-Centric Manual Testing:** Strong foundation in manual exploratory testing to identify critical UI/UX flaws, edge cases, ensuring a seamless experience beyond what code can catch.
 - Agile Defect Management:** Provided clear, actionable bug reporting and documentation, collaborating closely with project/ gig developers to streamline the "find-to-fix" lifecycle(& re-testing) in fast-paced Agile environments.
- Logistics And Distribution Specialist : Modern Trade & Depot Replenishment** Jun '21 — May '23
Nigerian Breweries Plc(Heineken Group) Lagos, Nigeria
 - Developed and executed enterprise-wide transformation strategy that eliminated 99% of stock outages across 36 depots and 200+ modern trade outlets nationwide, generating estimated annual cost savings of **₦250M+** through optimized inventory management
 - Championed adoption of emerging technologies by designing and implementing real-time KPI dashboards in Power BI, providing actionable insights to 50+ stakeholders across sales, distribution, and operations
 - Eliminated waste and reduced losses** by leading cross-functional collaboration between logistics, customer service, and production teams, resulting in significant depot distribution cost reductions and optimized inventory flow.
- Operation Manager** Dec '15 — Jun '21
Nigerian Breweries Plc(Heineken Group) Lagos, Nigeria
 - Led enterprise transformation initiative applying Lean Six Sigma methodologies to optimize end-to-end brewing operations, achieving 10% reduction in lager brewing cycle time and eliminating critical production bottleneck that increased annual capacity by 2.4M hectoliters
 - Collaborated with packaging, logistics, and procurement functions to design optimal weekly production schedules, balancing demand forecasting with capacity constraints to achieve 97% fulfillment rate
 - Championed data-driven decision making by establishing real-time production monitoring systems that ensured quality control consistency.

CORE COMPETENCIES/TECHNICAL SKILLS

Data Analysis SQL, Python, Power BI, Microsoft Excel, Predictive Analytics, Data Modelling
Project Management Jira, Asana, Kanban, Agile, Lean Operations
Continuous Improvement Gemba Kaizen, KPI Reporting, KPI Management
Change Management Stakeholder Engagement, Report Writing, Business Intelligence, Product Management
Database management SAP ERP
Quality Assurance Black Box Testing, Selenium WebDriver, Playwright, Git (Version Control System), End To End Testing

AWARDS

Best STEM Student (2005) – Kwara State, Nigeria

EDUCATION

M.Sc in Microbiology, University of Ilorin

2013
Nigeria

CERTIFICATIONS

Diploma in Brewing 1 & 2, Institute of Brewing and Distilling
Lean Six Sigma, Heineken
Software Testing(Quality Assurance), Power Learn Project Africa
